

International Commissioning Engineer

Are you an experienced international commissioner who likes to travel, easily changes location and able to proudly say that, partly because of your knowledge and skills, the customer is 100% satisfied with our robot machine. Join PWR with our highly technical solutions for machine building.

This will be your job:

You take the responsibility for the implementation and commissioning of our latest packaging machines at our international customers site. After installation by our installation team, you will put the machine into operation on customer location.

You do the final checks and, together with the customer, put the machine in production. As a knowledge provider, you are the point of contact for the customer in this phase of the project. You ensure a good transfer of the work operating instructions and as an expert you solve any problems that arise during commissioning. We are looking for you because you are enthusiastic, experience in mechanical engineering and willingness to travel. You know what it is like to be away from home and have no problem working irregular shifts.

Success is yours by:

- Independently commission machines at our customers' premises;
- Identifying problems and solving them professionally;
- Training our customers in the use of our machines;
- Providing a clear transfer to our service department;
- Visiting existing plants to carry out machine inspections and upgrades;

What we ask of you:

- Education in Industrial Automation / Mechatronics / Electrical Engineering or Mechanics
- Demonstrable experience as a Commissioning Engineer or (Field) Service Engineer within machine building or other high-tech industry in an international environment.
- Knowledge of PLC systems, Vision systems and / or CoDeSys systems (Schneider Electric)
- Experience with the high quality and hygiene requirements of the food packaging industry.
- Mastering the Dutch and English language.

You get this from PWR:

- Working for a technically advanced organization where innovation plays an important role; who wouldn't want that?;
- Join #teamPWR; pleasant ambiance, friendly and enthusiastic colleagues with yearly and seasonal activities;
- A fulltime job position and a matching salary;
- Excellent compensation for staying abroad.

Convinced we will be a good match?

Now it is up to you! If you want to know more, please contact Marcel Tankink, via mtankink@pwrpack.com. If you want to apply directly, send an e-mail with short motivation and CV to recruitment@pwrpack.com. See you soon!
